

STEEKKLEMMEN
VOOR HARDE KABEL
GRIJS NYLON

Push-in Connectors Economy Type

- Housing: Polyamide 6.6
- Flame retardant: UL 94 Class V-2
- Clamp Unit: Tinned steel plate with copper strip and spring steel
- Working temperature: T110 (IEC), 105°C (UL)
- Accepts rigid/solid conductors up to 2,5 mm² / 22~12 AWG
- Rated to 600V max for building wiring and 1000V max for lighting fixtures and signs.
- Compact size design perfect for tight spaces.
- Does not require twisting and taping
- Test slot in the back permits easy testing with a voltage tester
- For use in building distribution and junction boxes
- Can be reused with wire sizes that are larger than the one previously removed
