

KABEL CONNECTOREN & BESCHERMERS

ADEREINDHULZEN

Een adereindhuls is een speciaal busje van dun vertind koper dat om het uiteinde van de samengestelde kern van een elektrische draad wordt gekrompen. Het doel van het gebruik van een adereindhuls is om een optimaal elektrisch contact te realiseren tussen alle koperdraden in de kern en de klem waaronder het uiteinde wordt bevestigd.

Bij de keuze van de adereindhulzen is het van belang dat je de juiste nominale diameter selecteert, zodat de draad goed in de huls past.

Een WT adereindhuls wordt geleverd in een niet-geïsoleerde en geïsoleerde variant met polypropyleen als isolatiemateriaal voor zowel de enkele als de “twin” versie. Bij deze varianten wordt de isolatie van de adereindhuls over de geïsoleerde buitenmantel van de draad geplaatst.

Toepassingsgebied :

Adereindhulzen op installatiedraad in een steekklem (lasklem)

Draad aansluiten op een lusterklem (kroonsteen)

Draad klemmen in een steekklem (lasklem.)

Hoe gebruiken :

Een adereindhuls plaatsen op de draad is te realiseren in een aantal stappen.

1/ Draad strippen: Om te beginnen dient de mantel van de draad gestript te worden met een daarvoor geschikte striptang.

2/ Huls plaatsen: Nadat de mantel van de draad is gestript en de koperdraad blootligt, kan de huls om de koperdraad geplaatst worden. Dit doe je door middel van de kern van de draad ver genoeg in de huls te plaatsen. De draden mogen niet uit de huls steken.

3/ Krimpen van de huls: Nadat de huls juist is geplaatst om de draad, kun je de huls vast zetten met een hiervoor geschikte krimptang.

TECHNICAL SPECIFICATIONS

Terminal: Red copper (Cu-ETP), electro tin plated

Insulation: Polypropylene (PP)

Min. coating thickness: 3 μm

Max. temperature: 105 °C

STANDARDS

REACH and RoHS compliant

DIN 46228/4

Compliant to EU directives 2002/96/EC (WEEE), 2002/95/EC (ROHS) AND 2003/11/CE

KABEL CONNECTOREN & BESCHERMERS

ADEREINDHULZEN

CORD END TERMINAL - NON-INSULATED

STANDARDS

REACH and RoHS compliant

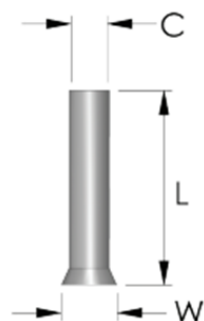

DIN 46228/1

Compliant to EU directives 2002/96/EC (WEEE), 2002/95/EC (ROHS) AND 2003/11/CE

Terminal:

Red copper (Cu-ETP), electro tin plated

Min. coating thickness: 3 µm
